Bombay:
PRINTED FOR GOVERNMENT
AT THE
BOMBAY EDUCATION SOCIETY'S PRESS.

1853.

No. 365 of 1852.

Political Department.

From the COMMISSIONER IN SINDH,

To the Right Honorable LORD VISCOUNT FALKLAND,
Governor and President in Council, Bombay.

Dated 21st October 1852.

My Lord,

I have the honor to submit a letter from the Collector of Shikarpore, handing up Reports from his Deputies on the Districts lately resumed from Meer Alli Moorad, and attached to his Collectorate.

No. 228, dated the 1st ultimo, with the following enclosures :—

No. 1. Letter No. 49, dated 16th March, from Lieutenant Webster, Deputy Collector, with copy of a Report upon the Booldeka District.

No. 2. Copy of letter from the same Officer, No. 76, dated 9th April, with Report upon the Districts of Shahbeyla, Chuck, and Syudabad.

No. 3. Letter from Lieutenant Lester, Deputy Collector, No. 67, dated 30th April, with Report upon the Districts of Oboura, Meerpore, Ludda Gagun, and the Bukkar, Arore, and Bamburkee Tuppas.

No. 4. Copy of Lieutenant Dickson's Reports of the Annual Revenues and Population of the Villages in Moghlee.

2. These documents comprise a great amount of valuable statistical details, to which Lieutenant Lester has added some curious historical information, and they reflect very great credit on the Officers by whom they have been compiled.

3. The subjects discussed in these Reports are not generally of immediate practical importance: the few points which seemed to call for remark are noticed in my reply to the Collector, copy of which is annexed, and will, I trust, be approved.

I have the honor to be,
My Lord,
Your Lordship's most obedient Servant,
H. B. E. FRERE,
Commissioner in Sindh.

Commissioner's Office, Kurrachee, 21st October 1852.

No. 228 of 1852.

Revenue Department.

From the COLLECTOR OF UPPER SINDH,

To the COMMISSIONER IN SINDH,

Kurrachee.

Dated 1st September 1852.

Sir,

I have the honor to forward the accompanying Reports upon the Resumed Districts attached to this Collectorate, as called for in your letter in the Political Department, No. 148, of the 22nd January last.

1. Letter No. 49, dated 16th March, from Lieutenant Webster, Deputy Collector, with copy of Report upon the Booldeka District.

2. Copy of Letter from the same Officer, No. 76, dated 9th April, with report upon the Districts of Shahbeyla, Chuck, and Syudabad.

3. Letter from Lieutenant Lester, Deputy Collector, No. 67, dated 30th April, with Report upon the Districts of Oboura, Meerpore, Ludda Gagun, and the Bukkar, Arore, and Bamburkee Tuppas.

4. Copy of Lieutenant Dickson's Reports of the Annual Revenues and Population of the Villages in Moghlee.

2. These reports have evidently been prepared with much care and attention by the officers to whom this duty was assigned, and I need scarcely remind you that it has been done under every difficulty and disadvantage. The few officials found in the districts were such as we should employ as inferior Mohurers: the Mooktyarkars, or Head Revenue Officers, and other principal officials employed under the Meer's Government, were required to be in their districts during the harvest seasons only, and when our officers proceeded to take charge, they found the Kardars' offices vacated. They had all, with one or two exceptions, been called in, taking with them the only scraps of memoranda they had in their possession.

3. Revenue accounts there were none. One of the first steps taken by me on the resumption of the forfeited districts, was to despatch two Moonshees, for the purpose of selecting from the Meer's Duftur the "Khasras," and other revenue accounts; copies of "Jageer" and free grants, and of contracts appertaining to the districts in question. They returned with a few papers of old date, stating that the whole of the Duftur had been destroyed by the rain which fell in the year previous; having been kept in some delapidated house in Khyrpore. Under these circumstances, and without the aid of the Meer's officials, or records of any kind, these reports have been compiled by Lieutenants Lester and Webster, proceeding from village to village, and there obtaining from the Zemindars and village authorities the information here embodied.

4. The first report treats of Booldeka, comprising 31 villages and hamlets, of greater or less extent, extending over an area of about 354,396 beegas, of which it is estimated that not more than one-tenth is under cultivation. I was not prepared to hear that even this proportion of the district was cultivated. The district, as you already know,

has for some years been wholly given up as a hunting-ground: there has been no protection given to life or property, and the people from whom any amount of industry could be expected have been driven out of it.

5. Lieutenant Webster has calculated the annual land revenue at Co.'s Rs. 33,243: this I perceive is made at the Government rate of rubbee assessment, Rs. 1-8-0, and not at the rates charged by the Meer, which are found to average Rs. 2-8-0, and in some places Rs. 3-8-0 per beega. The value put upon the grain revenue is taken at Rs. 15 per khurwar all round, being the selling price in the district at a time when the trade, particularly of the resumed districts, was almost suspended. The present rubbee crop, I believe, will amount to about half as much more than Lieutenant Webster's calculation; and the "Sayer Revenue," which Lieutenant Webster probably had not the means of inquiring into, I estimate at Rs. 7,000, making an aggregate revenue of about Rs. 56,800.

6. I confidently hope that when the canals are re-opened, the rights of property acknowledged, and the looting propensities of the present inhabitants are put down, we shall never realize a smaller revenue than what I have here stated, but that it will increase year by year.

7. It will be observed that there are in some moderately-sized villages as many as three and four rates of assessment in kind, and an equal number in cash. The "Buttai" would seem to be the mode of assessment; but there is a desire among the cotton-growers to adopt cash rents, and many have compounded with the District Contractor, Ranja Mull, for moderate money payments. The whole of this district is represented to be favourable for the culture of cotton.

8. The transmission of these reports has been deferred thus long, as I have been anxious to settle the accounts of the Contractor, in whose hands we found this district. You are aware that Booldeka, and portions of other districts, were assigned to certain creditors of His Highness the Meer, in liquidation of his debts. Booldeka had thus been made over to Dewan Ranja Mull, of Roree, a man of considerable wealth, all of which has been acquired in his capacity of money-lender to the whole Khyrpore family.

9. He took the contract of Booldeka for two years, from the khureef crop 1261, for Rs. 78,001-4-0, Sajawallee currency, or Co.'s Rs. 72,492. The deed of contract specifies several contingencies, for which remissions from the stipulated amount were to be made. This contract expires with the rubbee crop now being gathered in; but it would appear that before this contract had half expired the Contractor had claimed a large amount of compensation, or remission of the rent, on account of diminution of crop, resulting from a failure of the river in that season. The compensation provided for in the contract deed was not granted in the manner stipulated, nor was the amount of loss upon which the demand was made ascertained; but a new contract was entered into, making over the same districts and lands to the Contractor for two years longer, upon the same terms as the first. Shortly after this second arrangement having been concluded, the son of the contractor gave cause of offence, and he was thrown into prison. The Contractor thereupon threw up the contract, and withdrew his officers from the district. The Meer's people then resumed charge of it, and collected the revenues of the khureef crop 1262.

No. 1 Translation appended.

No. 2 Translation appended, with addition made to Appendix No. 1.

10. Last December, the Contractor's son being liberated, the district was restored to him, and he had just resumed his contract a few days before His Highness the Meer forfeited the district and other portions of his territory. He, moreover, found that all the khureef revenue had been levied, with the exception of about four khurwars of grain, which he took.

11. When the proclamation on the subject of the forfeiture of the districts was known, the Contractor put in his claim for the unexpired portion of his contract, stating that he had advanced Rs. 40,000 to His Highness the Meer. No original bond was forthcoming. Copies thereof were presented, together with sunnuds and perwanahs in original, in proof of his claims. His Highness the Meer was applied to for the original bond, and, as before stated, Moonshees were sent by me to procure from his Duftur all such documents. These were promised from time to time, but all attempts at getting this contract deed have up to the present time failed.

12. The authenticity of the sunnuds and perwanahs having been acknowledged by His Highness the Meer, the Contractor was permitted to resume his contract, pending the result of further inquiries. He has since discovered that he will not be allowed to govern the district, or to exercise the authority and powers with which he was vested for the purpose of exacting his rights ; and submits, that unless he has such powers, it will be useless in him expending money upon canals, or in any other way, in view of guaranteeing the revenues.

13. Another complaint is this, that he has been accustomed to take the grain realized by him as revenue at a price fixed by himself, and to profit by this as much as the state of the market would admit of. This question is open to doubt. It is rather to be inferred that the Meer, in winding up the accounts, would put an arbitrary price upon the grain. But no adjustment of the account having at any time been made by His Highness' officials, there is no precedent in enabling me to decide the point. No account can be rendered by the Meer of the khureef revenues realized during the incarceration of the son, and for which the Contractor claims compensation to a considerable amount; nor have we the means of finding out what the khureef revenue amounted to. Under these circumstances, the Contractor is desirous of throwing up the remaining two years' contract, provided he can recover the sum advanced by him to the Meer, as also different sums paid on account of canal clearances, presents of loongees to Zemindars, building Kardars' derahs, and other such expenses, amounting to Rs. 3,241-14-6.

14. His accounts were little to be relied upon. He had few acknowledgments or vouchers to support them. It became necessary, therefore, that the whole of the Meer's and the Contractor's accounts should be scrutinized. This has been done, and the Contractor has certified before me that the balance of the debt amounts to Rs. 19,935-13-3.

15. There is a separate amount of Rs. 5,140-9-0 claimed on different accounts, which I have disputed, but these cannot just at present be inquired into, as the parties whose evidence is required are not at hand. In the first mentioned amount is a sum of Rs. 9,350 claimed by the Contractor on account of seventeen months' salaries to district establishments, at Rs. 550 per mensem. His first claim on the same account was much larger, having been made at the rate of Rs. 800 per mensem ; but I find no such charge stipulated for in the contract deed, unless the contract was summarily transferred to another party offering a higher amount for it. This, to my mind, is perfectly clear.

It has never been allowed to him by the Meer, and the head Dewan informs me that no such charge was intended, or stipulated for, unless under the abovementioned contingency. Deducting this amount, therefore, there remains a balance of Khyrpore Rs. 10,585-13-3 in favour of the Contractor; and the disputed amount above referred to, Khyrpore Rs. 5,140-9-0.

16. The claim having been thus reduced, it is probable that the greater part of it will be realized by the Contractor from the present rubbee crop, now being harvested; and I see no necessity in his having anything further to do with the district. Should any, however, remain due, it can be paid to him from the succeeding crop. The grain now in store will be disposed of to the best advantage under the joint supervision of the Contractor and the Government officers.

17. I need not mention the many advantages which are likely to follow from the course now proposed. In a district so thinly peopled as this is, it would have been impossible to have attempted any works of utility without in some way or other interfering with the supposed rights of the Contractor; and it must be evident, that, deprived of all coercive powers, he must have been helpless in any attempt to improve the country, or to realize its revenues in his accustomed way.

18. The only other part of the same district assigned for debts is marked No. 7 in the Statements, viz. Morah, the annual revenue of which is stated to be Rs. 1,354. This will be reported upon separately, as the debt is mixed up with other lands in His Highness the Meer's possession.

19. The lands assigned to Mr. Bease have before been reported upon, and I need not, therefore, notice them here.

20. The districts of Shahbeyla, Chuck, and Syudabad comprise 12, 7, and 3 dehs, or zemindarees, respectively, containing 42 villages and hamlets, and occupying an aggregate area of 121,304 beegas. These lands are claimed by His Highness Meer Alli Moorad as his inheritance, for which an equivalent will be given on the left bank. The rates of assessment in kind and in cash are less variable than in the adjoining district of Booldeka. The "Buttai" and "Dandhundee" systems are most generally in use, one-third and one-fourth being the Government share of the crop. The "Mhasoolie," or cash rents, are high, averaging Rs. 3-8-0 on cotton and vegetables, in some places reaching as high as Rs. 5 and 7 upon sugar-cane.

21. The estimated aggregate annual land revenue of these districts is stated to be Rs. 27,227. The sayer revenue I estimate at Rs. 1,700, making a total of Rs. 28,927.

22. The soil in these and in the Booldeka district is known to be favourable for cotton: samples of this product will be submitted. It may be remarked, as affording proof of the greater security to life and property in these districts, as compared with Booldeka, that the population in the former is stated as 14,547, while that of the latter, Booldeka, although three times the area, is stated to be only 13,416.

Lieutenant Lester's Report. Purgunna Oboura.

23. The Purgunna Oboura is stated to comprise 174 villages, with an area of 70,266 beegas, and a population of 12,096 souls. The land revenue for the year preceding is estimated at Rs. 88,891 by Lieutenant Lester, but I am informed that a vast extent of cultivation was submerged during the khureef season of that year. This district, exclusive of

the Imamwah tuppa, was never known to yield less than one lakh per annum, until it fell under the mismanagement of His Highness Meer Alli Moorad. The sayer revenues may be taken at Rs. 8,000 per annum.

Meerpore Purgunna.

24. The Meerpore district comprises 82 villages, with an area of 200,000 beegas. The revenues of this district for last year were also greatly reduced by the excessive inundation and rain. The bunds and canals had been allowed to fall into disuse, and in many parts of it the only communication between village and village was by boat. But, notwithstanding the great loss of property that occurred, the land revenue amounted to Rs. 88,891, the sayer revenue to Rs. 6,000, making a total of Rs. 94,891. The population is stated to be 17,654. The alienated lands are put down at Rs. 26,085 annual revenue.

Deh Dadlow.

25. This is a deh consisting of 1 good village of the same name, and 11 hamlets, with an area of 8,000 beegas. It is situated in the Ghotkee district, and did not come into the hands of the British with the rest of that country, having been a jageer held by Beebee Junnut, widow of the late Meer Shahdad, of the Hydrabad house, and now residing at Dejee. About two or three years ago His Highnees Meer Alli Moorad gave this lady another jageer instead, and made this over in lieu of pay to Surrufraz Khan, a military retainer. This individual was paid off with all other mercenaries, and the deh has therefore been resumed. Its annual revenue is stated to be Rs. 1,150.

Arore, Bukkar, and Bamburkee Tuppas.

26. These districts occupy the upper portion of the Narra country, and comprise 46 villages and hamlets, with a population of 8,212. The estimated land revenue of last year is stated to have amounted to Khyrpore Rs. 12,880, and this was chiefly upon the Arore and Bukkar tuppas, both of which are in jageer. A considerable portion of the revenue, however, used to be taken by His Highness the Meer, in accordance, it is stated, with former custom, when there happened to be any produce at all in the country.

27. The sayer revenues are estimated at Khyrpore Rs. 450.

28. But all cultivation in these districts has been exceedingly precarious, depending, chiefly, upon the old Eastern Narra, when the inundation or direct overflow of the Indus happened to be sufficiently great to feed it.

29. The rights of the Jageerdars, holding the lands above alluded to, will be separately reported upon, as, in the event of our opening a communication between the Narra and the Indus, their values will be greatly enhanced.

30. The Ludda Gagun district, or such portion of it as may not be proved to be in the hereditary possessions of His Highness Meer Alli Moorad, will, in all probability, be exchanged for his other possessions on the right side of the Indus. The revenues of this much of the district have been estimated at Rs. 52,000. In this are included several jageers, the retention of which must depend upon the principle of settlement to be adopted in regard to the different Meers' families now located there.

31. Lieutenant Lester has reported upon the whole of this district as fully as he has done upon the others; I need not, therefore, say further regarding it in this letter.

Villlages in Moghlee.

32. The resumed villages in Moghlee, now included in the Shikarpore and Boold-eka talookas, are 24 in number, having an estimated area of 29,435 beegas, and yielding an aggregate annual revenue of about Rs. 7,200.

33. The report of the jageers, and other alienated revenues, should have accompanied this. They comprised nearly 160 claims, small and great. The present sickness, however, among the office clerks, has prevented their being copied out, and as these reports have already been greatly delayed, I shall forward the others as soon as possible. The total amount of claims of every description amounted to Rs. 54,325-15-3, exclusive of those made by members of the Ameers' families, and mercenary troops. The proportion deemed by me to be admissible and re-grantable under the rules laid down by you is Rs. 41,828, but it is probable, I think, that as we cause further inquiries to be made into some of the cases, that a still greater reduction may be made.

34. I shall feel much obliged by your returning to me, at your convenience, the original statements and reports herewith sent, as I have been unable to have them copied.

I have the honor to be, Sir,

Your most obedient Servant,

T. R. STEUART, Captain,

Collector, Upper Sindh.

Shikarpore, Collector's Office, 1st September 1852.

No. I.

REPORT

ON THE

BOOLDEKA DISTRICT.

No. 49 of 1852.

Revenue Department.

From the DEPUTY COLLECTOR OF SUKKUR,

To the COLLECTOR IN UPPER SINDH,

Shikarpore.

Sir,

Having now completed my circuit through the Booldeka district, I have the honor to forward, without delay, for the information of yourself and the Commissioner, the result of my observation and inquiries.

2. You will perceive I have adhered, as far as practicable, to the suggestion contained in the last paragraph of the instructions drawn up for my guidance, by arranging the chief mass of information in a tabular form, which, together with the accompanying remarks, and rough map, will, I trust, be found to afford a tolerably clear insight into the topography, resources, and condition of the purgunna.

Tabular Statements marked 1, 2, 3; Map.

3. The information has been carefully gleaned by me in person on the spot, from the Zemindars, Cultivators and Bunyahs in the various localities, and is, I believe, in the main, as correct as the sources from which it is gained will admit. Whatever individuals may have formed the revenue and judicial establishments entertained by the Contractor who held charge of this district for some years, they had vacated their post, and left the neighbourhood before my arrival, so that I have not had the advantage of access to any official sources for information.

4. The rough map has been sketched with the aid of a prismatic compass, observation being taken from every available point, and corrected by book angle; the distances being laid down from the computation of the most experienced inhabitant, and verified by relative position. I have unfortunately been without any sort of map of the country as a guide.

5. No pains have been spared to render the information as copious and correct as possible, and where it is defective, it must be attributed to inexperience in the department rather than want of due attention to the subject.

I have the honor to be,

Sir,

Your most obedient Servant,

T. B. WEBSTER, Lieutenant,

Deputy Collector.

Sukkur, Deputy Collector's Office, Camp Chimmun, 16th March 1852.

The district of Booldeka or Boordeka takes its name from the inhabitants--a tribe of Beloochees called Booldee. It is situated on the right bank of the river Indus, to the south-west of Kusmore, which district, with the river, forms its eastern boundary; while the hills lie to the north; Shahbeyla, Khanpore, and Meerpore to the south-west. Its extreme length and breadth may be about 50 and 60 miles respectively.

2. It is divided into zemindarees or dehs, and jageers, the boundaries of which, though unmarked by any artificial object, are well known to the Natives by natural objects mutually selected and agreed upon for the purpose. No other divisions, either topographical or fiscal, are familiarly known.

3. Its general aspect is that of one vast plain, uninterrupted by any perceptible elevation or depression; though, I believe, there is a gradual fall towards the south.

4. It is covered with jungle, more or less thickly, as it has chanced to be cleared, or lies near to or far from the river, composed of trees, bushes, and grasses, common to Upper Sindh, with here and there large patches of trees, such as the bhan, babul, &c.

5. The former, judging from their appearance, are not of many years' growth, and tend to confirm the assertion of the Natives to the effect that the shikargahs in this zillah have only been formed since it came into Meer Alli Moorad's possession.

6. The soil partakes much in its general character of that of the Ghotkee and Syudpore districts, being free from rock or stone, and without any considerable quantity of sand or shorah in its composition.

7. You will observe by the Tabular Statement that but a very small portion of the land (comparatively speaking) is at present under cultivation; and such as is under the plough is chiefly in little detached flats, cleared in the midst of the jungle.

8. Within about 20 miles of the river there is no difficulty in procuring water for agricultural purposes, there being many canals, reservoirs, or "Kolabs." Wells are plentiful in part, and more could easily be formed.

9. In the zemindaree of Kund Kot the proprietor informed me (and his statement was verified by others), that there are no less than 100 wells sunk of burnt bricks. I inspected three that have been cleared out, and two then being repaired. I found them to be large and admirably built, evidently the work of a more enterprising and intelligent people than the present generation of Beloochees. These, together with the comparatively ruinous state of the town and canals, confirm the report that the district was once in a far more flourishing condition than at present; a fact of which there can be no doubt. It is very difficult, however, to arrive at any definite conclusion from Native information as to the exact period. It would appear that the towns of Dhurree and Buddanee were once famous, the former for its bows, arrows, and saddles, the latter for its matchlocks, trades now no longer existing.

10. I am inclined to believe that the more prosperous condition of the country must have been prior to the Beloochees forming the chief part of the population; for their predatory and indolent habits are assigned by the other Natives as one of the many causes of its decline. It would seem, that up to the time that the present arrangements were made for the protection of the frontier, this province was much subject to the incursion and depredation of the tribes inhabiting the neighbouring hills. The still increasing

depopulated and unproductive condition since that time is universally attributed to Alli Moorad's oppressive system of government, under which no encouragement to industry was afforded, the cultivator's rights but ill respected, and a considerable amount of labour without any remuneration annually exacted from him in a way most odious, viz. keeping in repair the shikargahs, in which were bred in numbers the wild hog, that devoured the greater part of his scanty crop, while he was not ever allowed to defend his field by scaring off these wild animals.

11. I am credibly informed that the annual revenue has dwindled down within the last twenty years from nearly Rs. 1,00,000 to the present amount, which may be roughly computed at Rs. 40,000.

12. The climate differs, I am informed, from the neighbouring districts, inasmuch as it is far less healthy, and particularly inimical to the Hindoo constitution, the proportion of deaths among whom is far larger than that of the Mussulmans. Many of the former have died during my sojourn here, while I have only heard of one or two instances among the latter. Fever is very prevalent, even at this season.

13. Among other serious disadvantages against which the honest cultivator has had to contend hitherto, is the insecurity of his property, theft of all kinds constantly occurring, while cattle were stolen daily, and often before the owner's eyes, by armed gangs of ruffians, who as openly restored the animals on receiving what they considered a fair sum as ransom. This crime is evidently viewed by the Booldees as of a very venial nature, and the system hitherto obtaining for its punishment tended but little to check it. On apprehension, in case the culprit did not confess, which he seldom objected to do, he was subject to severe corporal punishment till he did, and then fined double the value of the stolen property. The necessary amount to cover the fine was quickly forthcoming from his accomplices and friends, who, if they did not possess it, effected another robbery for the purpose of procuring it. As the fines were appropriated in all cases by Government, a considerable addition to the revenue was thus realized. In civil suits a fee of one-fourth the amount sued for was taken.

14. In case of the prisoner not paying the fine imposed, he was kept without other food than he could obtain by begging in the streets of the town, where he was taken once a day for the purpose by the Kotwal. On his ultimate release the Kotwal received one rupee as his fee.

15. In consequence of all the officers who may have formed the district establishment under the Contractor having vacated their posts and left the neighbourhood prior to my arrival, I have been without any sources of official information, and am therefore unable to report with any confidence on the establishment entertained by Ranja Mull, the Tukadar, who has held this district for the last three or four years, with the exception of an interim of some three or four months. I am led to believe, however, that there did not exist under that functionary anything like a permanent or well-regulated system, but that he and his son administered justice, while they employed officers to assist in collecting the revenue from time to time as necessity called for.

16. The Beloochees, who form the chief portion of the inhabitants of this district, are of the Booldee tribe, and subdivided into numberless classes or tribes, such as Soonderanee, Soranee, Bejaranee, Chachuranee, &c.

17. There is no distinction, however, in their religion, and but little in their manners

or customs, as they frequently intermarry. I am unable to ascertain satisfactorily their origin, or the period since which they have inhabited this country, as their own accounts, which I alone have to guide me in forming an opinion, being temporarily shut out from other sources of information, differ widely, and are vague. From what I can gather, I am inclined to believe that it is some 150 years since they gained a footing here, but doubtless their history is too well known to require such speculation.

18. They now bear the character of being an indolent predatory people, much more given to theft and prosecution of feuds than habits of industry and agricultural pursuits. One characteristic of them, I am informed, is great pliability, and doubtless they are much influenced by the Government they serve, and are susceptible of great improvement.

19. They express the greatest joy at the change of rulers, and hold out promises of immense increase in agricultural activity, saying that under our Government this will become a most fertile country, having naturally a fine soil, and only requiring a sufficient population protected from oppression to bring it nearly all under cultivation. It is complained that for the last ten years the most industrious classes of the inhabitants have been migrating to the surrounding British districts, to avoid the tyrannical conduct towards them of their rulers. These people, they say, will now flock back.

20. The subject of all others that they now appear anxious about is the system of collecting the revenue: they express the greatest fear of, and dislike to, any but that of "Buttai," and state that the "Daudhundee" system was often forcibly imposed on them by Ragoo Mull.

21. The method of buttaing grain is as nearly as possible such as obtains in our older districts, differing only in immaterial and minute particulars in each zemindaree.

22. The grain is collected in spots selected by the Buttaidar, who, having secured the Government share, the Zemindar takes his, and after the local employés have received their dues, the cultivator appropriates the remainder.

32. It will be seen by the Tabular Statement marked No. 3 that grain of nearly all kinds is grown: that some kinds are not now raised is not attributable to any defect in the soil.

24. Cotton is much more grown than grain, on account of being less destroyed by the wild hog. There are weavers in nearly every village, and I am told that nearly all clothes are home-made, the cultivator giving the produce of his field to the weaver to manufacture for him, usually paying for the labour in kind.

25. With the exception of the Zemindars, their families, and the Bunyahs, few or none of the people can read, write, or keep accounts: there would, therefore, be a difficulty in finding individuals among them fit to fill the post of Tuppadar.

26. Scarcely any camels are seen, but goats and buffaloes are kept in great numbers, and it is on the produce of the latter that the Natives depend materially for their subsistence. The ghee is bartered for other necessaries, and the curds, milk, &c. form a chief article of their food. Cotton and ghee are exported to a very considerable extent.

27. The cultivation is fluctuating, and depends upon a variety of local circumstances, such as supply of water, and land requiring to lie fallow. The cultivators are in no way tied to particular Zemindars, unless they should be in their debt, or the proprietor have become security for them. Capital for agricultural purposes is here, as generally in

Sindh, supplied by the Bunyahs, who charge interest varying from 2 to 4 annas per mensem per rupee, according as the borrower is more or less trustworthy. The loan is recovered in grain by the Sharoff, who has a first claim on the produce.

28. It is asserted that there is nearly three times the amount of land under rubbee cultivation this year as there was last, and that quite double the number of beegas will be brought under the plough for the peshrus and khureef crops.

29. The great addition in the former is attributed, they say, to the supply of water brought by the Sindh, on the breaking down of the bunds above.

30. The position of this natural canal (if I may so term it) will be seen by my rough map; and as it appears to me to afford a most valuable means of supplying the centre of the district with a large body of water for agricultural purposes, I beg particularly to solicit attention to it, and suggest that means be adopted for increasing its connection with the river. Below the bunds formed at Meerghur is the Noorwah : the only material junction with the river is effected by a canal excavated by Meer Alli Moorad at the suggestion of Major Jacob, which is called the Meerwah. The supply of water thus afforded being insufficient, an increase might be obtained in various ways, without any very great expense, either by widening the Meerwah, or clearing and putting in a state of repair the Ding Kaiwa or Khanwah.

31. I have received many petitions on this subject, as also praying for slight pecuniary aid, to enable several of the Zemindars to clear small canals and wells.

32. The Kardar is anxious to make Dhurree his head quarters, as being more central in point of cultivation than Ghospore, and much more healthy. As it contains buildings hitherto used for the purpose, and which with a little repair will be more suited, I would suggest that the Kardarate be established there.

33. I am of opinion that about fourteen Tuppadars will be required, and when they and their subordinates are established in the district there will be no necessity to continue the four Kotars temporarily appointed to look after the shikargahs. These forests are chiefly situated in the neighbourhood of Dhurree, Bindee Jafer, Morah, Shaho Kot, Bhunner, and Gooblah. The "Mohories" or fences of nearly all have been destroyed by fire, but no material injury has been done to the bhan, or valuable trees, which are chiefly contained in the shikargah lying near the river.

34. Copies of 278 sunnuds in the possession of separate individuals have been taken, and an abstract of such claims as appear to have been respected by Meer Alli Moorad is given in the last column of Tabular Statement marked No. 2.

35. I would again repeat, that the point upon which the Natives are above all others anxious and pressing, is for an assurance that the Buttai system will be continued for the next few years, in which case they promise to extend the cultivation three-fold.

T. B. WEBSTER, Lieutenant,
Deputy Collector.

Camp Chimmun, 16*th March* 1852.

STATEMENT No. 1,

Showing the Number of Towns and Villages in the Booldeka District, with Number and Description of Houses in each, as also Shops, Schools, Moosaferkhanas, Wells, Gardens, and Trees; Number of Inhabitants; their Religion and Occupation, &c. &c.

* It will be seen that the adults are alone counted. At an average of 3 children to each woman, the Population would amount to 13,416, making about 6¼ to each hut.

† Arabic, &c. is taught to about 14 or 15 pupils.

‡ These Villages contain from 1 to 12 huts, are not permanent, but moved from time to time, according to local circumstances, such as cultivation, and grazing lands, &c. &c.

‖ The Kotars, the only permanent Village Officers, are appointed, usually by the Zemindar, for life. Their duties are so multifarious and undefined, that it is almost impossible to enumerate them: they are the organ of communication between the Zemindars, Cultivators and Contractors: they cannot keep accounts; receive contributions of grain from the Zemindars, Cultivators, and Contractors, amounting to the value of about Rs. 4 to 5 a month.

§ At least half of these are also Cultivators, making a total of about 3,688 men following that occupation.

Camp Chimmun, 16th March 1852.

				27750		7712		10550	93430	214954	354396	36	128	7	..	..							Average.	8	1 to 4	32		..	..	..	35	119		1727	781 5	183	167	10	269	9

Average proportion of the Land under cultivation to the whole, about one-tenth :—
Estimated total number of Beegas under cultivation, 35,462.
Probable yield in Khurwars, calculating at 15 Khurwars per Beega, Rs. 8,865.
Probable value in Rupees, calculating at Rs. 15 per Khurwar, 132,975.
Government Share, at an average of one-fourth the produce ..... Rs. 33,243
Add double the Number of Beegas confidently expected to be brought under Khureef and Peshrou cultivation in the fasl 1262 6,500
Total estimated Land Revenue .. Rs. 39,743

It will be seen that the number of Cultivators is estimated at 2,658.
Ditto ditto ditto Beegas ditto 35,462.
This gives an average of about 11-6-1 beegas per man, and it is calculated that one man with a pair of oxen will bring 14 beegas under the plough annually ; thus showing that the present population is sufficient to cultivate about 43,252.

Dehs marked (1), (2), (3), (4), (5), and (6), are given in Jageer.
Ditto do. (7), (8), and (9), are given to the extent of half the Deh.

Camp Chinnun, 16th March 1852.

No. 76 of 1852.

Revenue Department.

From the DEPUTY COLLECTOR OF SUKKUR,

To the COLLECTOR OF UPPER SINDH.

Dated 9th April 1852.

Sir,

I do myself the honor to inform you that I have completed my tour through the districts of Shahbeyla, Chuck, and Syudabad.

I now forward, for the information of the Commissioner and yourself, my Report, arranged in the form of Tables, as nearly as possible similar to those I drew up for my former report.

These districts being so immediately in the vicinity of our own, are, I presume, already too well known to require anything beyond a statistical account at my hands. I append, however, a few remarks, which, together with the rough map, will, I trust, afford all the information that is likely to be useful for the present.

I have the honor, &c.

(Signed) T. B. WEBSTER,
Deputy Collector.

Sukkur, 9th April 1852.

(True copy)
T. R. STEUART, Captain,
Collector in Upper Sindh.

The accompanying rough map will show better than a verbal description the form and relative position of the districts of Shahbeyla, Chuck, and Syudabad, which are sudivided into zemindarees or dehs.

About one-fifth of the land of the former is composed of what is termed "Pucka," and the remaining "Kutcha." The soil is nearly all of good quality, and produces great quantities of cotton and wheat, which is esteemed particularly good. At present there is no indigo grown, but many parts are well adapted for its cultivation.

Trees thrive remarkably well, and more are seen here than in most parts of Upper Sindh.

In the shikargah lying near the river are great quantities of valuable timber trees, as the babul and bhan.

As will be seen, the canals are well placed, and there are many wells, so that there is no want of means of obtaining water for agricultural purposes, though many of the canals have been allowed to fall out of repair, and have been much neglected.

The villages are chiefly composed of mat houses, but they have an appearance of cleanliness, while the people generally seem in easy circumstances; in these respects forming a striking contrast to the Booldeka district, so far more prosperous is its apparent condition. It has known, however, a more flourishing time: some twelve years ago there was at least one-third more under cultivation than at present, and, among other things, it produced large quantities of ghee, for which it was famous.

The decline is universally attributed to Alli Moorad's system of government, to his having increased the number of shikargahs, and failed to afford any encouragement to the cultivators.

Already the prospect of a change of rulers has had the effect of inducing the farmers to bring more land under cultivation for the peshrus crops, and the khureef are likely to be increased in a still greater degree: indeed, it promises to become a very fertile district.

Chuck, which lies north-east, partakes much of the general character of Shahbeyla, but contains little or no kutcha land, and has altogether less under cultivation, and more soil in which there is sand and shorah.

Syudabad, lying on the bank of the river, and being at the same time high, renders its position valuable; but, on account of being near Sukkur, extensive irrigation is prohibited, and, consequently, there is a good deal out of cultivation. The Zemindar is a Patan, in whose family it has been for the last four generations. They having originally purchased the deh, are also Buttaidars, and enjoy half the Government dues, besides their zemindaree rights. The remaining half is said to be given in jageers, but I have not yet had the sunnud presented to me for inspection. Under Alli Moorad there were two Kardars in Shahbeyla: the one at Allivan received Rs. 10 per mensem, with a daily allowance of 10 seers atta, 1 kasa grain, and 4 annas. His establishment consisted of a Moonshee on Rs. 13 per mensem, eight Sepahis, each at Rs. 1 a month, and a daily allowance 2 patoes grain, and 2 pisa.

The other Kardar, stationed at Abad, received Rs. 12 a month, 1 kasa grain, and 7 seers atta daily, with one Moonshee and five Sepahis on the pay above mentioned.

The "Buttai" system prevailed, and the method of collecting revenue is as nearly as possible such as prevails in our own district.

Buttaidars were appointed for six months at a time, on a salary of Rs. 25, 2 kharwars grain, besides a daily allowance of 1 patoe grain, 1 seer atta, and 1½ anna.

The Putwarees usually received Rs. 10 and 1 kharwar grain for the season, besides a daily allowance of 1 toyah grain, 1 seer atta, and 5 pisa.

Copies of all deeds showing claims to jageers, puttahs, serees, &c. have been taken, and a summary is given in the last column of Statement marked No. 2.

Chuck has usually been in the hands of Contractors, and Syudabad of Jageerdars, and, consequently, there have been no Government employés in these districts.

(Signed) T. B. WEBSTER,
Officiating Deputy Collector, Sukkur.

Sukkur, 9th April 1852.

* These Kotars are paid by small contributions of Grain from the Cultivators before the harvest, and at the time of battaing the Grain they receive two-thirds of the part set aside and termed Choongee. These Officers assist the Kardar and Zemindar, acting as a medium of communication between them and the Cultivators.

No. III.

REPORT

ON THE

DISTRICTS ON THE LEFT BANK OF THE INDUS.

No. 67 OF 1852.

POLITICAL DEPARTMENT.

From LIEUTENANT J. F. LESTER,
Deputy Collector on the Left Bank of Indus,

To CAPTAIN T. R. STEUART,
Collector Upper Sindh.

Dated 30th April 1852.

SIR,

In accordance with instructions received in your letter No. 28, of the 23rd January last, I have the honor to inform you that on the 26th of that month I proceeded from Sukkur to take charge of the districts on the left bank lately ceded by Meer Alli Moorad.

2. These districts comprehend the purgunnas of Oboura, Meerpore, Ludda Gagun, Bukkar, Arore or Alore, and Bamburkee, with an isolated portion called Dadlow, in our old talooka of Ghotkee.

3. A sketch map of the district on the left bank, under this Collectorate, is appended, and the relative position of the different purgunnas will at once be seen. The map is on a scale of four miles to an inch, and is compiled from some of our old maps and surveys; but since these districts were surveyed, I have found that many alterations have been made in the then existing boundaries, and the present sketch is submitted only to show the relative positions of the different divisions of the country.

Sketch Map A.

4. The average length from north to south of our possessions in Upper Sindh, on the left bank, is 98 miles, and average breadth 60 miles.

5. The purgunna of Oboura, called also "Dérhkee," is the most northern division. On the north and west it is bounded by the Bhawulpore territory; on the south and south-west by the purgunnas of Meerpore and Ghotkee; and on the east the boundary line separates it from the Jeysulmere State. The purgunna is divided into seven tuppas, as shown in the margin. The divisions are, however, quite nominal. There are no defined boundaries, either of tuppas, purgunnas, jageers, or zemindarees, throughout this and all other portions of these districts: where, however, natural boundaries are found, they are generally acknowledged.

Purgunna Oboura, or Dérhkee. (Vide Memo. B.)

Oboura, Khyrpore Dérhkee, Kummooshaed, Emamwah, Reytee, Rawuntee, and Syudpore Dérhkee.

6. Next to the Oboura purgunna, southward, is the purgunna of Meerpore, or Mérhkee. It is divided nominally, like Oboura, into eight tuppas, as noted in the margin, and is bounded on the north by Oboura; on the east by the Jeysulmere territory; on the west by the purgunnas of Ghotkee and Roree; and on the south by those of Bukkar and Bamburkee.

Purgunna Meerpore, or Mérhkee. (Vide Memo. B.)
Nao Khalsa, Meerpore, Mahtella, Khanpore, Mobarrickpore Lohee, Pittafee, Jurwah Noorwah, Dinganahwah Chakerwah.

7. The third purgunna is that of Ludda Gagun. On the north and west it is bounded by the river Indus, and a part of the Roree purgunna; on the south by the Gagree purgunna; and on the east a range of low barren hills divides it from the purgunnas of Bukkar, Alore, and Bamburkee. It has not been determined what portion of this district will finally belong to us.* It contains at present 25 principal towns and villages, of which 13 are the property patrimonial of Meer Alli Moorad, seven are jageer villages, and five are now claimed by our Government.

Purgunna Ludda Gagun.

8. The purgunnas of Bukkar, Arore or Alore, and Bamburkee, complete our lately acquired Upper Sindh possessions on the left bank. These three districts are not nearly so fertile as those already mentioned. They are far removed from the full influences of the inundation, and cultivation in them is dependent chiefly on well water and rain, which appears to fall pretty regularly in its season towards the eastern or Jeysulmere boundary. The Eastern Narra passes through these districts. This is not a flowing river, but its deep and broad bed is divided into reservoirs of water, of great length, from which are cut minor canals and ducts, for purposes of irrigation. (Vide Table C.)

Purgunnas of Bukkar, Arore or Alore, and Bamburkee.

9. Dadlow is a small portion of land in our old district of Ghotkee. It contains about 8,000 beegas of land, of which only 500 are cultivated, 2,000 are culturable, and the remaining 5,500 are barren and unprofitable. It is watered by a few small canals (vide Table C), which are chiefly branches from the Korae canal, flowing through the Ghotkee and Roree purgunnas. The chief village is Dadlow, and it is surrounded by a number of small hamlets. The total number of inhabitants in this isolated portion is about 280, and its annual revenue is estimated at Rs. 1,200.

Dadlow.

10. The Government proclamation received with your letter was promulgated throughout every chief town and village of these new districts. I found that all the Meer's Government officials had left the country; some had left without any assigned reason, but most, it was said, had gone to give their accounts to Meer Alli Moorad, by whom they had been summoned. The Government kutcheries were empty, and no records or papers of any kind were to be found. I am not, therefore, able to give such full and perfect information as I might otherwise have done, had I been able to consult the officials of the late Government, or their records. As directed in the Commissioner's instructions, a list of Government servants under the Meer is annexed. (Vide Table G.)

11. Statistical information connected with these districts will be found embodied in a series of Tables, viz:—

A.—Sketch Map of the Country on the Left Bank, under the Upper Sindh Collectorate.

* Vide Separate Report No. 15, dated the 5th ultimo.

B.—An account of the Dérhs and Mérhs of Dérhkee and Mérhkee.

C 1, 2, 3, 4.—List of principal Canals and their Branches in the several Purgunnas; their length, breadth, and depth.

D 1, 2, 3, 4.—List of chief Towns, Villages, and Hamlets, of the ceded Districts; their estimated Revenue, and Extent; their estimated Population; and the number of Shops and Trades.

E 1, 2, 3, 4.—List of Zemindars of the new Districts; the estimated Extent of their Estates; the number of Wells on their Lands; and the Canals by which their Lands are irrigated.

F 1, 2, 3, 4.—List of Jageerdars, and Enamdars, and the estimated Extent and Value of their Jageers.

G.—A List of Government Property.

H.—A List of Officials under the late Government.

I.—An account of the Town of Mahtella, in the Meerpore Purgunna.

K.—Synoptical Table, showing Population, Towns, &c. &c. throughout the Districts.

Character of the Country.

12. The character of the country may be considered under two divisions. The three purgunnas of Oboura, Meerpore and Ludda Gagun, as being near to, and under the direct influence of the Indus, have a character different from that of the purgunnas of Bukkar, Alore, and Bamburkee. These latter are some distance from the river, and shut out, in a great measure, from the benefits of the annual floods, by the range of hills which divides them from the purgunna of Ludda Gagun.

The character of the country of the three first named districts is a level undulating plain of rich alluvial soil, which, during six months of the year, is in parts more or less covered by the waters of the inundation. There are no hills or mountains in these districts (except the range which bounds Ludda Gagun on the east); but the country stretches away from west to east in one vast plain to the Jeysulmere frontier. Cultivation extends to about two-thirds of the average breadth, that is to a distance of about 40 miles from the river. These districts are intersected by some excellent canals (C). They are principally canals of irrigation, and a few of the larger ones, such as the Meerwah, in Ludda Gagun, the Mussowah and Emamwah, in Oboura and Meerpore, are navigable for river boats of moderate burthen. The canals generally have been much neglected of late, not having been cleared for three or four years. The main canals, or leaders, are broad and deep, and many of them are crossed by pucka built bridges. These, with the canals, have not been cared for, and are falling to ruins; but they all indicate a former degree of prosperity and industry.

13. The Eastern Narra once flowed through the entire length of these districts from north to south, and passed on into Lower Sindh. The bed is now generally dry, but some portions of it contain water which has been left by each receding inundation, and replenished on the return of the flood season. These large tanks or reservoirs of water enable the inhabitants of the purgunnas of Bukkar and Bamburkee to carry on cultivation. There are very few canals in these last named divisions, and the few there are are comparatively small and insignificant. Cultivation in these districts, as has been before remarked, is dependent chiefly on well water and rain.

14. There are no artificial lakes, tanks or reservoirs. Several natural ones are found. They are formed in natural hollows and lowlands, on the receding of the Indus floods. They are known under the names of "Kolabs" and "Tullāōhs," and the fisheries on them are sold annually by contract.

15. There are several patches of wooded country in these districts—they cannot be called forests: the trees are chiefly the bhan, the babul, the neem, and the tamarisk. Peepul trees of great size and beauty are seen, but they do not grow in clumps: they mark, principally, the site of a town or village. Nearly every town of any size has its fine old peepul tree near it. These wooded portions are chiefly the hunting preserves of Meer Alli Moorad: as such they have been preserved with great care, and are full of game. The best are those which skirt the river.

16. A list of the chief towns is given in Tables D. The principal ones are—of Oboura: Oboura, Shahbazpore, Khyrpore, Dérhkee, Rawuntee, Fuzil Lugaree, and Reytee;—of Meerpore: Meerpore, Islam Lusharee, Hajee Korae, Jhan Khan, and Soomur;—of Bukkar and Alore: Alore, Thuroor, Dadhoo, and Winjkah;—of Ludda Gagun: Khyrpore, Mustee Khan-ki-Tunda, Kingree Badshapoor, and Kunder.

17. The buildings are chiefly of kutcha bricks. The houses generally are single storied, and flat roofed, but in the larger towns houses of two or three stories are seen, in which reside wealthy Bunyahs, or chief Zemindars. The houses generally are not well built, and the towns and villages are dirty mazes without plans.

18. The old ruined town and fort of Mahtella, in Meerpore, is, perhaps, one of the most striking and interesting. (Vide Memo. I.) It is built on a rising piece of ground, which, perhaps, is not altogether a natural mound. It is recorded in the Tohfut-ul-Kiram, that Rahi Sohasi II. ordained for his subjects, in lieu of tax, that they should *fill up* or repair six forts—Ooch, Mahtella, Suwari, Mud, Alore, and Lewistan. It contains about 650 inhabitants at present, but from its appearance it must have numbered not many years ago some two or three thousand.

19. Alore or Arore, a ruined town and fort, about eight miles south-east of Roree, is another remarkable spot. The river Indus is said once to have flowed near it.

20. The population of these districts, as generally throughout Sindh, is divided into two classes, Mussulmans and Hindoos. The former are the agricultural and labouring portion of the community, and the latter the mercantile and trading. In Tables D will be found an estimate of the population of both classes in every village, and the proportion of classes will be found to be one Hindoo in every three Mussulmans, nearly.

22. The chief trades are those of carpenters, brick-makers, tanners, and leather-preparers. There is no export trade in manufactures, but an import trade of earthenware and brassware from Jeysulmere exists, and in exchange grain is exported to that country.

Land Revenue.

23. Land revenue is collected under three forms of assessment—"Buttai," "Kasgee," and "Cash Rent." "Sayer" revenue—from fisheries' customs, "Sir Shumari," ferries, "Meerbhuree," &c.—is received through contractors, to whom these are sold yearly in contract. All matters connected with sayer revenue are arranged by the Meer's Mookhtearkar direct with the contractor. Contracts are entered into for one or two years generally. District Kardars and officials have nothing to do with sayer revenue

matters, and were called upon only to afford protection or assistance to the lessee if required. The contractor paid all instalments of revenue direct to the Mookhtearkar. This latter functionary resides, generally, and conducts business at Khyrpore, unless called upon to attend the Meer at Deejee or elsewhere.

24. The following are the land products :—

Land Products.

Rubbee, or Spring Crop.—Wheat of three kinds; barley; gram; pease; mustard; dhania; alliah; arjun; opium; tobacco; bang; and kussoomba.

Khureef, or Winter Crop.—Jowaree of three kinds; bajeree; shalee; nauglee; till; moong; mash; indigo.

Peshrus, or Middle Crop.—Sugar-cane; and cotton.

25. The three forms of assessment are "Buttai," "Kasgee," and "Cash Rent."

Forms of Assessment.

The "Buttai," *as a system*, is very similar to that obtaining in our older districts. It is a division of produce between the Government and the cultivator. The Government share varies considerably in different localities. It is either one-half, one-third, one-fourth, one-fifth, or two-fifths, regulated according to place and circumstance. The "Toyakee" payments (or "Choongee") to minor buttai officials and village functionaries are varied and complicated, every village, nearly, having its own rates and systems.

26. "Cash Rent" is not a very general mode of assessment in these districts, and where it is found the rates are heavy, when compared with the standard of our older possessions. The rates vary from Rs. 1½ to Rs. 6 per beega.

27. The following list shows the crops which are generally cash assessed, and the various rates of assessment on them throughout these districts :—

Cotton, from Rs. 1-8-0 to Rs. 2-9-0 per beega.

Sugar-cane, from Rs. 4-0-0 to Rs. 5-9-0, and 6-9-0 per beega.

Tobacco, from Rs. 1-0-0 to Rs. 2-7-0, 2-13-0, 3-13-0, and 4-14-0 per beega.

Badinjur, from Rs. 1-0-0, to Rs. 1-11-0, 3-3-0, and 3-9-0 per beega.

Kussoomba, from Rs. 1-0-0 to Rs. 1-8-0, 1-12-0, 2-0-0, 2-5-0, and 4-0-0 per beega.

Onions, from Rs. 1-0-0 to Rs. 1-11-0, 2-13-0, and 3-9-0 per beega.

Melons, from Rs. 1-0-0 to Rs. 2-0-0, 2-13-0, and 3-9-0 per beega.

28. The following are general rules in regard to revenue forms of collection :—

1*st.*—Grains are never cash assessed : they are either buttaied, or in kasgee.

2*nd.*—Indigo is never cash assessed, always buttaied.

3*rd.*—Sugar-cane is always a cash rent crop.

4*th.*—Cotton, also, is generally a cash-paying crop : it is sometimes, but seldom, buttaied.

5*th.*—Vegetables, fruits, and herbs, are generally under cash assessment.

29. The third is the "Kasgee" system of collection. It is known under two forms —1*st*, Kasgee on well lands; 2*nd*, Kasgee on other than well lands.

Kasgee is the fixing or determining, from the appearance of the crop while standing, a certain quantity of grain which the cultivator will be able to pay to Government on every beega of cultivation. This duty is entrusted to Ameens, who are chosen every fuslah from men of known and acknowledged respectability. Their duties are onerous

and responsible, and they are generally well paid, that is, they receive from Rs. 60 to 100 and 150 per mensem, and frequently a valuable loongee is given on the completion of their fuslah duties. To each Ameen, a Moonshee or Mohurer is attached, who receives a salary equal to one-half of that of his Ameen. The rates at which kasgee payments are made vary from 4 to 8, 10, and 12 kasas per beega. The amount having been fixed by the Ameen, the field is measured by a zabit, and the fixed quantity of grain is then received from the cultivator, through the Umbardar, and removed to the Government granary.

Kasgee on well lands is levied from the cultivator, not on the decision of an Ameen, with regard to the state or condition of his crop, but by a fixed rate, according to the "Puttah" which he holds from Government.

30. In Tables D 1, 2, 3, 4, the estimated extent of land and produce are noted. In the absence of all "Khasras" and records, it has been a matter of some difficulty in arriving at true results. These tables of revenue produce are only, therefore, on a rough estimate, and the amounts shown are, I believe, less than what the districts are capable of producing under proper care and management. I believe them capable of about Rs. 4,50,000 in the aggregate, inclusive of the whole of Ludda Gagun, and exclusive of the Ghotkee and Roree talookas.

31. No portions of these districts are leased out to contractors. The land revenue is collected direct from the ryots by the Government Kardars and district officers. The Kardars seem to have had almost unlimited power in their respective districts. They could fix assessment at any rate they thought fit, without reference to higher authority, and grant free rent lands, and grants of "Seree" and "Mamool." These latter appear to have been given chiefly to the Hindoos, and in great numbers. I believe there is scarcely a village where grants of this kind are not met with. The claims are supported by puttahs, given by the Kardar himself generally. Under these puttahs, loongees and clothes are claimed periodically, or bits of land are apportioned to the grantees, under tenures the most anomalous and perplexing.

32. Grants of mamool and seree were generally abolished throughout our older districts in Sindh in 1844 or 1845.

33. The chief Mussulman tribes are the Dérhs of Dérhkee, and the Mérhs of Mérhkee. They are the principal landholders in these districts. In Ludda Gagun farmers are of various tribes of Mahomedans, and towards the range of hills which forms the eastern boundary of this purgunna, the country is cultivated chiefly by Beloochee shepherds. Their villages are small, mean, and dirty, and the people themselves poor and ill-clad.

34. Tables E 1, 2, 3, 4, contain lists of all Zemindars throughout these new districts, with the extent and nature of their estates. The estates vary in extent from 100 to 15,000 beegas, but the average area of estates is about 2,500 or 3,000 beegas. The Zemindars themselves cultivate the soil as far as possible, but they have tenantry, who cultivate on their lands. The tenantry are a sort of brotherhood or clan-ship, of which the Zemindar is generally the chief. It may be considered a fixed tenantry. They are attached to the soil, from its having been possessed by their forefathers. Emigration seldom takes place, except under extraordinary circumstances, such as drought, pestilence, or any other like calamity, and when emigration does take place, it is only for a season,

until the occasion is past. But, although the tenantry is generally a fixed one, there are nomade tribes of cultivators, who come either from foreign territory, or wander from place to place in our own, and cultivate wherever the soil and circumstances are favourable. They make their agreements with the Zemindar for the season, and after it is passed they are at liberty to remove elsewhere should they so wish it.

35. The capital for labour is found by the cultivator or Zemindar himself. Recourse is not often had to the Bunyah for "Tuccavee" advances, but when it is found necessary to look to him, grain is advanced, and repayment made at the rate of a kharwar and a quarter, or a kharwar and a half, for every kharwar advanced, on the harvest of the produce; and if money be borrowed, the interest is generally at the rate of $3\frac{1}{2}$ or 4 per cent. per mensem.

36. Where Government receives its revenue in a share of the crop, under a buttai form, the usual routine attaching to that system in our older districts is gone through, and the cultivator takes possession of his own, after the Government share has been removed. In kasgee collection, the cultivator cuts his crop after it has been inspected by the Ameen, and pays the amount of grain fixed to Government through the Umbardars, under the superintendence of the Kardar. Umbardars are appointed by the Government, and used to receive payment at various rates in grain, and there were many perquisites attaching to the office, which varied in different localities.

37. I have not met with any tenures analogous to the "Puttah-daree," common about Shikarpore, and I am informed that none such exist.

38. Tables F 1, 2, 3, 4, give a list of the Jageerdars, with the estimated extent of their estates, and the produce of them. Their several claims are now under investigation.

39. The permament village and district officers are Urbabs, Mookees and Kotars. There are none such office as those of Patels, Mokuddums, and Canongoes. The term "Urbab," and the duties appertaining to the office, are similar to those of Mokuddum. The Urbab, or "Purrea Murs," as he is generally called, is the head man of the village. The office is hereditary, and where the heir on the death of his father is a minor, the position is temporarily held by another, until the rightful heir becomes of age to succeed to his father's place. It is not a stipendiary office, but he receives something every harvest in grain from the farmers of his village: it is what the term Purrea Murs signifies,—an elder,—one looked up to by his village community as the adviser and arbiter in all troubles and disputes.

The "Mookee" is the leader of the Hindoo portion of the community. He is generally made the referee in their domestic affairs, and is the acknowledged adviser and regulator in their mercantile transactions. He receives no stipend, and the office is generally hereditary, the heir being always acknowledged, except when incapacitated by mental or bodily infirmity.

Village "Kotars" hold office hereditarily, and their duty is to assist in municipal matters connected with their respective towns and villages. They are supposed to be acquainted with zemindaree and village boundaries, and to point out the same to Government officials whenever called on. They receive a small amount of grain from the general produce of each fuslah. This amount varies in different localities, but on an average it is about a toyah and a half on every kharwar of produce.

40. Government weights and measures are of a uniform standard throughout these districts. The "Gunda" measure is longer than ours by 4½ inches, ours being 7 feet 6 inches, and the Meer's 7 feet 10½ inches.

The "Toyah" measure differs from ours, thus:—

	Seers.	Chuttaks.	Dooka.		
80 Co.'s Rs.=1 Seer.	4	3	1	=	1 Company's Toyah.
	3	13	½	=	1 Meer Alli Moorad's Toyah.

The weights and measures in use among the people vary considerably, particularly in Ludda Gagun, where nearly every town has its own peculiar standard. The following table will show this:—

Numbers.	Names of Places.			Seers.	Chuttaks.	
1	Liaree Kotlah	96 Akeyshai	Rs. = 1 Seer.	3	4	= 1 toyah.
2	Kunder	96 ditto	= ditto.	3	0	= ditto.
3	Bubberlow	96 ditto	= ditto.	2	8	= ditto.
4	Alipore	96 Khyrpore	Rs. = ditto.	2	12	= ditto.
5	Garhee	96 ditto	= ditto.	3	2	= ditto.
6	Bheeralow	88 ditto	= ditto.	3	5	= ditto.
7	Moree Mulliar	96 ditto	= ditto.	3	4	= ditto.
8	Oolra	90 ditto	= ditto.	3	4	= ditto.
9	Machee	80 Company's	Rs. = ditto.	3	8	= ditto.
10	Khanpore	84 Khyrpore	Rs. = ditto.	4	4	= ditto.
11	Mustee Khan-ki-Tunda	84 ditto	= ditto.	4	8	= ditto.
12	Dhund Jeyl Satal	80 Company's	Rs. = ditto.	4	8	= ditto.

This table could be extended to many more places, but the above enumerated will show the varieties of measure which exist.

In Oboura, 84 Akeyshai Rs. = 1 seer.

In Meerpore, 92 Akeyshai Rs. = 1 seer.

The tables of measure in Meerpore and Ludda Gagun vary, and are thus:—

In Meerpore.	*In Ludda Gagun.*
4 Toyahs = 1 Punkhee.	4 Chowties = 1 Patoe.
4 Punkhees = 1 Dhurree.	5 Patoes = 1 Dhurree.
4 Dhurrees = 1 Pie.	4 Dhurrees = 1 Kasa.
40 Pies = 1 Kharwar.	5 Kasas = 1 Toka.
	12 Tokas = 1 Kharwar.

41. The clearances of canals, whenever they are determined on, are carried out under the general superintendence of Darogahs appointed for the purpose. The main canals generally of Meerpore and Oboura are in common, and the chief Zemindars of these purgunnas supply each their quota of labourers in the proportion of two-thirds from Oboura and one-third from Meerpore. Besides the Government Darogah, the chief Zemindar of Oboura and the chief Zemindar of Meerpore has each his own Darogah to assist in superintending the clearances of the main canals. The Government Darogah receives for himself 4 tuccas in cash, and 1 seer of flour per diem; and for his horse 1 toyah of grain daily. The Oboura chief Zemindar pays his Darogah at the same rate, but the Meerpore Zemindar gives less.

42. " Huckaba," or water rate, is a system not known in the districts on this bank.

43. In most of the principal towns Kardars' Kutcherries and Landees have been found: these appear generally to be in good order, and will for the present, I think, be sufficient. In a short time, when I shall have had opportunities of seeing and knowing more of the wants and requirements of these districts, I hope to submit a report on the subject of buildings for Kardars and Police.

I have the honor to be,

Sir,

Your most obedient Servant,

J. F. LESTER,

Deputy Collector Left Bank.

Sukkur, 30*th April* 1852.

B.

A BRIEF SKETCH OF THE HISTORY OF THE DERHS OF DERHKEE.

The Dérhs are a race of Mussulmans, and principal landholders of the purgunna of Oboura. They were originally Hindoos, and emigrated from their native country of Tonk Jodah, near Delhi, under their Chief, one Jodh Dérh, and came and settled in Oboura. This took place in A. H. 551, corresponding with A. D. 1035. The Dérhs took Oboura by force of arms from the Odhanas, a Mahomedan race who formerly possessed it, and Jodh Dérh became the acknowledged ruler of the district of Oboura. The Government descended from father to son, as shown in the following table:—

Genealogical Table of the Dérh Family.

No.	Genealogy.	Remarks.
1	Jodh Dérh.....	The conqueror, and first ruler of Oboura.
2	Gagun.	
3	Joomah.	
4	Udhun.	
5	Bhillah.	
6	Sarah.	
7	Chujjen.	
8	Ebrahim.	
9	Bhumboo.	
10	Abool Kheir.	
11	Bhumboo.	
12	Alim Khan.....	Surrendered to the Delhi King about A. H. 1050 (A. D. 1634).
13	Bhumboo.	
14	Abool Kheir.	
15	Bhumboo.	
16	Abool Kheir	The present Chief.

Alim Khan was the first Chief who surrendered his independence. He became subject to the Kings of Delhi; and one of their first sunnuds is dated A. H. 1052, by which one-half of the grain produce is allowed to the Dérh Chief, and the other half is taken by the Delhi Government. This sunnud, also, grants 400 beegas rent-free per annum, 4 gardens, and 4 wells. Sunnud No. 2 is one of the Emperor Aurungzebe, dated 17th Jummad-ul-Awul, 11th Jooloos. (About A. D. 1668-69, A. H. 1078—the Hijree year is not given.) By this sunnud, a remission of 20 kharwars on every 120 kharwars is made, also Rs. 5,000 peshkus, Rs. 400 on cash produce, and a tax of 2 tuccas on manufactures remitted.

Sunnud No. 3 is one of Ahmed Shah Dooranee, dated 19th Suffur, A. H. 1167 (A. D. 1753), to Bhumboo, Zemindar of Oboura. It is more of a letter than a sunnud, and states that one Ghoolam Mahomed had been sent from Cabool to restore confidence to the people of Upper Sindh.

Sunnud or document No. 4 is one from Ahmed Shah Dooranee, dated the month

Rujjub, A. H. 1171 (A. D. 1757), ordering the Hakim of Shikarpore to restore to Abool Kheir the lands taken from him by the Kaloras.

Sunnud No. 5 is an order by Ahmed Shah Dooranee, addressed to the Soobedar of Mooltan, dated Rubbee-ul-Awul, A. H. 1177 (A. D. 1762-63), ordering the restoration to Abool Kheir of certain lands taken from him by force.

Sunnud No. 6, dated Rubbee-ul-Awul, A. H. 1177 (A. D. 1762-63), by Ahmed Shah Dooranee, conferring on Abool Kheir the rights and privileges enjoyed by his father Bhumboo, lately deceased.

Sunnud No. 7, by Nuwab Innayut Khan, Wazir of Badshah Mahomed, Shah of Delhi, dated 15th of Jummad-ul-Awul (Hijree year not given), 3rd Jooloos, (corresponding with A. H. 1134, A. D. 1722,) conferring the zemindaree of Oboura on Bhumboo.

Sunnud No. 8, dated 11th Rubbee-ul-Awul A. H. 1192, granted by Ismael Khan Daodpootra, granting one-fourth of the lands of Subzulcote, 1 well, and 1 wheel. Subzulcote was formerly a portion of Oboura, until it was given to Subzul Khan by Bhumboo Khan, the great-grandfather of the present Chief. In A. H. 1211 the Talpur Chiefs, Meers Sohrab and Roostum, wrested from the Chief of Oboura some of the west and south-west parts of that purgunna near Sirhud, and called this acquired territory "Nao Khalsa": the Dérhs were, however, allowed the zemindaree of these lands.

In A. H. 1233 (A. D. 1817) the Talpurs took Subzulcote: two-thirds were possessed by the Hydrabad Ameers, and one-third by Meer Roostum.

The Talpurs continued to encroach by degrees on the possessions of the Dérhs in Oboura, until A. H. 1133, when only one-half remained in the possession of the Dérhs.

At length, on the death of Bhumboo Khan, the father of the present Chief, his son Abool Kheir was only allowed an eighth share of the Government revenue, beside zemindaree; he was permitted to hold one jageer called Chunnalee, and 4 wheels.

On the lands of Rawuntee, a jageer in Oboura, Abool Kheir only gets one-twelfth, but on all other lands one-eighth of the revenues.

J. F. LESTER,
Deputy Collector Left Bank of Indus.

ACCOUNT OF THE MERHS OF MERHKEE.

The Mérhs of Mérhkee were originally Hindoos, and emigrated from their own country in Hindoostan, under their forefather Chand.

It is not known in what year this occurred. The Mérhs themselves appear to be very ignorant of their own history. It appears, however, that they entered Sindh during the dynasty of the Rahis, and when Rahi Sohasi was on the throne. The Rahi made Chand Naib of Mahtella, and gave him a portion of that district in jageer. Sadarang was the son of Chand, and to Sadarang was born Sitmuk. Under the chiefdom of Sitmuk the Mérhs renounced the Hindoo religion, and became Mussulmans. The Delhi Emperor, in consequence, conferred on Sitmuk the name and title of "Khan," and gave him Mahtella in jageer. He is known by the Mérhs under the name of Sitmuk Khan.

J. F. LESTER,
Deputy Collector Left Bank of Indus.

Sukkur, 30th April 1852.

Deputy Collector Left Bank of Indus.

Sukkur, 30*th April* 1852.

I.

ACCOUNT OF MAHTELLA.

MAHTELLA is a fortified town in the district of Meerpore, about 45 miles north-east of Roree. It has the appearance of having once been a very populous and flourishing place. It is built on a rising piece of ground, and is supposed to have been founded by a Rajpoot named Amur about fourteen hundred years ago. He entered Sindh with an army of 190,000 men, of the Tartaree tribe, with a view to attack Neirem Kote (site of the present capital, Hydrabad). On his arrival at Mahtella, he heard of the advance of the Hubshee army, and of their having reached Fort Bukkur, to oppose him. He had been informed that it was the intention of the Hubshees, if they succeeded in repelling him, to proceed onward to Hindoostan. On hearing this, Amur made a forced march from Mahtella during the night, and arrived at Alore, once a very large town and fortress, but now a vast ruin, about 8 miles from Roree. An engagement took place here, in which the Hubshees were defeated. They retired on Sukkur, and the Rajpoot force marched back to Mahtella, and fortified it. Their Chief wished them to march on to Mooltan, but his followers refused to leave Sindh, and settled down at Mahtella; which took its name from Mahtella, the grandson of Amur.

No. 2385 of 1852.

POLITICAL DEPARTMENT.

From the COMMISSIONER IN SINDH,

To the COLLECTOR OF SHIKARPORE.

Dated 23rd September 1852.

SIR,

In reply to your letter as per margin, I have the honour to inform you, that I shall have much pleasure in submitting to Government reports so creditable to the industry of your Deputies as those enclosed in your letter.

No. 228, of the 1st instant, dispatched 13th, forwarding reports on the districts resumed from His Highness Meer Alli Moorad.

2. There is only one subject which appears to me to call for immediate notice, and that is, the alleged farm of the Booldeka District. From what is stated by you, as well as from what I learnt myself when in that part of the country, I have little doubt but that the renewal of the two year lease, if indeed it ever was renewed, was collusive. Even were it otherwise, it is not an engagement which it would be just to either Government or to the people of the district to recognise, as the rubbee crop was growing when the district was resumed. The best way to avoid disputes was that which you adopted, viz. to allow the contractor to reap it, keeping an account of what was removed, with a view to the future adjustment of accounts with the Meer. Your inquiries as to what the Meer really owed the contractor will also be useful, and can do no harm; but, as regards the future, I quite concur in the opinion you express, that there is no necessity for the contractor having anything further to do with the district; and I request that you will at once inform the contractor, that all his interest in the district ceased with the removal of the grain of the last rubbee crop, and that any further claim on the Meer must be matter for separate adjustment.

Paragraphs 4 to 19.

Paragraphs 16 and 17.

3. Under proper management, I have no doubt but that the revenue of this very fertile and improvable district (Booldeka) will greatly exceed the estimate given in your 6th paragraph.

4. The desire expressed by some of the cultivators to compound for the Government share of the produce, by agreeing to moderate money payments, will of course be complied with,

Paragraph 7.

as far as possible, not only in the case of cultivators of cotton, but of produce of every kind.

5. For the present, however, you should abstain from forcing cash settlements on any of the cultivators who may express an aversion to them. What is stated in more than one part of these reports confirms very strongly my belief, that however much of accident or caprice there may be in the varying rates of buttai, they often have reference to the varying productive capabilities of the land; and that it is not desirable to substitute one uniform rate everywhere, till we know more than we do at present of the real capabilities of different varieties of land.

6. The rights exercised by the Meer in the jageers in the Bukkar and Bamburkee Tuppas should be carefully investigated, as, if water is ever restored to the Eastern Narra, the question will become one of more practical importance than it is at present.

End of paragraph 26.

7. The original enclosures to your letter shall be returned when copied.

I have, &c.

(Signed) H. B. E. FRERE,
Commissioner in Sindh.

Commissioner's Office, Kurrachee, 23rd September 1852.

(True copy)
B. H. ELLIS,
Assistant Commissioner.

APPENDIX.

[*Referred to in Paragraph* 9, *Page* 4.]

Translation of an Agreement entered into by Dewan Ranja Mull with Meer Alli Moorad.

THE revenues of all cultivated land, grains, ferabee, hawabee, fees derived from marriages, both of Mussulmans and Hindoos, poll-tax on manufactures, the usual peshrushee on shopkeepers, tax on fishermen, land and river customs, produce from lakes, both new and old, reeds, and grass [of which ropes are made] in the moharees, agreeably to the agreement which was considered as commencing from 1st Jumad-ul-Sanee 1266, and ending Jumad-ul-Awul 1267, were leased for Rs. 3,676 of old currency, and on the terms as contained in the said agreement of Lalla Gungaram, the farmer of the excise, to whom it was previously granted, and which has now been cancelled. The Purgunnas of Booldeka, Jutookee, half of Bela Nurreel, Mukkans Jabelpoor, Kahee, Buddanee, Ding, which are in the districts of Nahurkee, and Bindee Jaffur Khan Soonderanee, were farmed for Rs. 6,525, and a distinct bond in the name of Lalla Gungaram written, which has also been cancelled; which contract commenced to have effect from Rubbee 1261, and was to end in Khureef 1262. Now, in lieu of those two, this one has been drawn up, wherefrom the Mukkans Mora Moree, Darapoore, half of Bhunnur, and Gunderah, are excluded; and I have, with the exception of the said mukkans, agreed, in the presence of Moorad Khan Juskanee, Futteh Mahomed Kohra, Shet Hot Sing, and Dewan Amil Roy, "Mootsuddee," with my free will and pleasure, to take on lease the above purgunnas for the sum of Rs. 78,001-4-0, of the Ṣozawullee currency, with a discount of 2 per cent., commencing from Khureef 1261, month of Rujjub, A. H. 1266, and ending Fusl Rubbee 1263, month Jumad-ul-Sanee, 1268, for 2 years, which embrace 4 fusls. May it please the Almighty that the revenue in cash and kind, "Ferabee," "Hawabee," fees from Mahomedan and Hindoo marriages, poll-tax, peshrushee, tax on fishermen, land and river customs of the districts, produce from lakes new and old, grass grown in the moharees, and reeds, of the above described purgunna, and of all the places adjoining them, with the exception of the aforementioned mukkans, commencing from, and ending on, the said fusls, and months, in conformity to the usage of old, on being collected, the cash portion of the revenue be paid to the Sirkar in the shape of instalments in each fusl. Should another individual come forward, and offer a larger amount, it is optional with the Sirkar to accept of it; but the person whose offer may be accepted must refund to me the amount paid in advance on account of this contract, as per receipt, with the interest thereon of (1) one per cent., and present me with loongees according to the note in my possession. He must also reimburse me for the expense of the payment of the establishment of the purgunna, and for the expenses incurred in waiting on the Meer, amounting in all to Rs. 800 of the current coin, for each month,

besides the loongees for the Zemindars, canal expenses, pay of Mooneebs, and Custom Gomasthas. All this will be immediately paid me, and he will take the paper containing the accountsof the revenue of the purgunnas. But if he is unable to pay that amount all at once, he will, until he does so, pay me monthly the sum above stipulated (viz. Rs. 800). If any mukkans or punnahs are given by the Sirkar to any individual in jageer, credit to the extent of their produce must be afforded. God forbid should any atmospherical or soil-bred calamity injurious to the cultivation prevail: or if it is destroyed by locusts, washed away by the river, damaged by troops, injured from hail or blight during the said fusls, I will receive such compensation as will be fixed upon by respectable Moonsiffs. For the police establishments I shall have no claim against the Sirkar; but by order of the Sirkar, should any expenses be incurred by me on account of Belooch troops furnished by the Sirkar to quell disturbances, such expenses will be repaid me by the Sirkar. Shares of "Hissadars," seeree and mamool, of the Zemindars, in accordance with the practice hitherto in force, will be given by me, on a computation of the extent of land cultivated, and no claims will be made against the Sirkar. I have written this in the form of an agreement, in order that should any disputes arise hereafter, my claims may remain undisturbed.

Dated Jumad-ul-Sanee, 1266.

For two years, from 1st Kurreef 1261 until Fusl Rubbee 1263, in the Sozawullee currency, on a discount of 2 per cent.....Rs.	78,001	4	0
Half for one year, Rs. 39,000-10-0; twice which amount makes Rs. 78,001-4-0; for two years more, viz. from Khureef 1263 to Fusl Rubbee 1265.....	78,001	4	0

Translation of a Perwannah, bearing the Seal and Signature of Meer Alli Moorad, to his Managers.

The revenue of the cultivated lands, grain, ferabee, hawabee, fees derived from marriages, both of Mussulmans and Hindoos, tax on fishermen, pushrushee on shopkeepers, poll-tax on manufacturers, produce of lakes, both new and old, land and river customs, grass [of which ropes are made] from the moharees, revenue of the Booldeka Purgunna, and half of Bela Nurreel, Juttoee, Mukkans Khan Buddanee, Ding, and Gahelpooree, in

the Nahurkee Districts, and Mukkan Bindee Jaffur Khan Soonderanee, the agreement for which was separate, now inserted in one, with the exception of the Mukkans Gunderah, Mora Moree, Darapoore, half of Bhunnur, is leased for Rs. 78,001-4-0 of the Sozawullee currency, with a discount of 2 per cent., commencing from Khureef 1261, ending Fusl Rubbee 1263, from the month Rujjub 1266, ending month of Jumad-ul-Sanee 1268, which contains two years and four fusls, according to the agreement, which is separately recorded, are made over to Dewan Ranja Mull. It is therefore necessary, that at sight of this perwannah, all their produce, according to what has been written above, and in conformity to the separate agreement, with the exception of the aforesaid mukkans, commencing from, and ending on, the fusl and month mentioned, be made over to him, that he may collect the revenue thereof, according to the custom. The cash in monthly instalments will be paid to Government, and you will receive the said accordingly, and pay it to the Sirkar. And the Sirkar has so agreed with the lease-holder, that should any other individual offer more on account of this contract, the Sirkar may except of it, but such contractor will make good the advance, with interest of 1 per cent. according to the terms of the receipt. He will also give the loongees, agreeably to the note. Besides the above, he will pay the amounts of payments of the purgunna, and expenses incurred in waiting on the Sirkar, viz. Rs. 800 fixed, of coin current, for each month, commencing from the month of Rujjub A. H. 1266, besides the expenses of canals and loongees, Zemindars, and pay of Mooneebs and Custom Gomasthas. All this he, the new contractor, will pay to the former lessee, and he will take the papers containing accounts. Until he pays all the above, he will not commence the contract. And God forbid should any atmospherical or soil-bred calamity happen to the cultivation; or if it is destroyed by locusts, washed away by the river, or if injured from hail or blight, or damaged by troops during the said fusls, compensation for the same, according to what respectable Moonsiffs agree upon, will be paid him by the Sirkar. But if any punnah or mukkan be given to any Jageerdar, he will receive compensation for the same. And for the expense on account of troops, such expense will be deducted, and all the sepoys entertained in the purgunna: the contractor will not receive compensation from the Sirkar on that account. And the seeree and mamool of the Zemindars, and the shares of the Hissadars, in conformity with the practice, will be given, more or less, according to the extent of the cultivation; and no claim will be made against the Sirkar. And it is necessary that you should act accordingly.

Dated Jumad-ul-Sanee, 1266.
